

Odenton Town Center Sewer Interceptor Odenton, MD

PROJECT OVERVIEW AND CHALLENGES

After another subcontractor failed to complete a guided-bore, Bradshaw Construction was contracted for the installation of 280 linear feet of 43 inch steel casing and a 30 inch ductile iron sewer pipe for an interceptor. The casing was jacked behind a microtunnel boring machine through medium dense sands and sticky clay below the water table. Performing the microtunnel out of a shaft that was originally intended for an auger bore proved to be the biggest challenge of the project.

PROJECT INFORMATION - 534

OWNER:

Anne Arundel County
Public Works
Sarimal Bachubhay
410-222-7500

ENGINEER:

Atkins
Bob Nelson
301-210-6800
bob.nelson@atkinglobal.com

CONTRACTOR:

Cossentino Contracting Co., Inc.

COMPLETION DATE:

2/25/2014

GEOLOGY:

Wet Sand

EXCAVATION METHOD:

Herrenknecht AVN-800 MTBM

MINING DIMENSIONS:

280' x 43" Ø

FINAL LINING:

30" Ductile Iron Pipe
